

SUNLIGHT

SPECTRALLY-SELECT CLEAR SOLAR PROTECTION

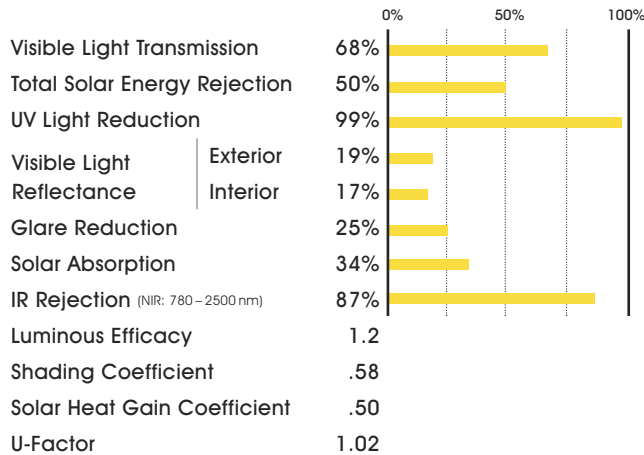

Ideal for stores, buildings and homeowners seeking maximum heat rejection without reducing the sun's light. Spectrally selective, Sunlight 70 provides a clear alternative to dark reflective films. Sunlight 70 is the perfect choice for performance, good looks and dollar value.

SUN70

HEAT REDUCTION	UV REDUCTION	GLARE* REDUCTION
50%	99%	25%

*Glare reduction % is for film on clear glass.

SOLAR SPECIFICATIONS

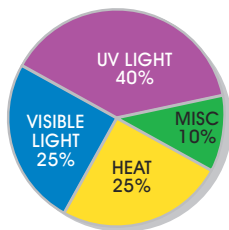

Solar specifications represent film mounted to 1/8 inch (3mm) clear glass.

Tests, equipment and methods are in accordance with ASTM, ANSI and NFRC standards. Calculations performed using Lawrence Berkeley Lab's Optics/Window 6. Values expressed hereof are typical and provided for comparative purposes only.

CAUSES OF FADING

Source: IWFA

PRODUCT BENEFITS

- A clear film with superior heat rejection
- Low reflectivity for enhanced views
- Blocks 99% of harmful UV rays that cause fading
- Durable long lasting CST™ scratch resistant hardcoat
- Backed with a comprehensive factory warranty

Recommended as an effective UV protectant.
